AI ENGINEER

Results-driven AI Engineer and MS Business Analytics candidate with expertise in LLM-powered applications and end-to-end GenAI pipelines across operations, edtech, and consulting. Skilled in Python, SQL, and cloud platforms (GCP, AWS) with a proven track record of translating complex business problems into scalable agentic workflows and AI solutions that drive measurable operational impact.

EDUCATION

Wake Forest School of Business, Winston-Salem, NC | Master of Science in Business Analytics | GPA: **3.96**/4.0 | *May 2026*
Honors & Leadership: *Beta Gamma Sigma, Wiseman Scholar, Graduate Student Ambassador, Center for Analytics Scholar*

Plaksha University, Punjab, India | BTech – Data Science, Economics & Business | GPA: **3.69**/4.0 | *May 2025*
Honors & Leadership: *Full Ride Scholar, Student Ambassador, Pioneer Student Election Committee Member*

SKILLS

Languages & Development: Python, Pandas, Statsmodels, Numpy, Scikit-learn, SQL, R, Excel, Stata, Git, MS SQL Server, ETL Pipeline
Machine Learning: Clustering, Multivariate Regression, Deep Learning, XGBoost, LightGBM, Decision Trees, Random Forest
Data Architecture & Cloud: GCP, Vertex AI, BigQuery, AWS (S3, SageMaker), Microsoft 365, Azure Synapse Analytics
Advanced Analytics & AI: Tableau, Power BI, Neural Networks, Hypothesis & A/B Testing, LLM APIs, GenAI, Agentic AI, RAG
Strategy & Operations: Data Storytelling, Stakeholder Management, Agile, Supply Chain Analytics, Project Management

EXPERIENCE

Wake Forest University | *AI Engineer* | Winston-Salem, NC *Mar 2025 – Present*
- Developing Gemini-powered conversational chatbot using LLM APIs and prompt engineering to deliver personalized, interactive learning of the Ethical Decision-Action Making (EDAM) framework, serving 500+ students across the university.
- Building GenAI-driven personalization workflows for the enrollment team, optimizing engagement across the admissions funnel for a pipeline of 2,000+ prospective students and improving operational efficiency.

Castlery | *Graduate Consultant* | Winston-Salem, NC *Oct 2025 – Present*
- Architecting a data-driven recommerce decision tree integrating cost, vendor performance, and operational constraints to replace manual 2-vendor selection, reducing cost per returned product by $500 through optimized routing logic.
- Developing robust predictive models to identify anomalies and patterns in operational data, reducing friction by 20% while translating models into actionable business strategies.

Benori Knowledge | *Data Science Tech Analyst* | Gurgaon, India *Jan 2025 – May 2025*
- Headed a data science solution to deploy an automated pipeline for dataset curation, gathering and cleaning data from various sources to save 25 hours weekly and generate $20K monthly.
- Applied statistical sampling and hypothesis testing to ensure unbiased model validation while enhancing feature engineering and ML pipeline logic, improving F1-score by 12% and reducing EOD by 18%.

Founder Forward | *Data Analyst* | New York, NY *Jun 2024 – Aug 2024*
- Built a Python-based ETL workflow to clean, transform, and load 5K+ records, improving data reliability by 45%.
- Developed 4 interactive dashboards in Tableau and Python for decision-makers, reducing time-to-insight by 40%.
- Partnered with operations teams to automate six database processes using JavaScript, enhancing system efficiency by 93%.

SBSF Agritech | *Data Scientist* | Berlin, Germany (Remote) *Jul 2023 – Aug 2023*
- Compiled and preprocessed 22K+ data rows to build a scalable data enrichment pipeline supporting growth curve modelling.
- Configured growth curves for 180 tree species in 40 agro-ecological zones, achieving a mean R-squared value of 0.86.
- Optimized ML models through Agile sprints, improving performance by 23%, strengthening species suitability assessments.

PROJECTS

DataCamp Data4Good 4th Annual Analytics Competition | *Team Lead* *Oct 2025 – Jan 2026*
Developed 12 NLP and generative AI models using embeddings, XGBoost, and LLM ensembles to classify answer factuality (0.97 macro-F1).

Wake Forest Data Analytics Challenge | *Tech Lead* *Sep 2025 – Dec 2025*
Engineered 10 fraud detection models using large datasets, achieving 84% capture rates and generating $3.6M in annual fraud savings.

PovertyPred: Deep Learning Project | *Machine Learning Developer* *Jan 2024 – May 2024*
Constructed a hierarchical graph convolutional network (HGCN) to predict household poverty levels in Kenyan villages from 90K street images, achieving an accuracy of 91% *(Project nominated for paper publication as 1 of 7 top submissions)*.

NOTABLE MENTIONS

- 2026 **First Runner-Up** (East Coast Region) DataCamp's 4th Data4Good Analytics Competition, competing against **120 teams**.
- 2025 Recipient of the **Wiseman Full-Ride Scholarship ($85, 000)**, Wake Forest University MSBA Program.
- 2024 **Libra Internship Program** Select from a global pool with an acceptance rate of 2.8% for the summer internship, New York.
- 2024 **Top 1%** in **NPTEL Database Management System** Course in a pool of **7134 students**.
- 2024 **Caseify Winner**: Business Case Study Competition judged by consultants from BCG, India.
