BUSINESS ANALYST

Results driven Business Analyst and MS Business Analytics candidate with expertise in translating complex data into go-to-market strategies, KPI reporting, and cross-functional decision support across SaaS, consulting, and consumer goods. Proven ability to build scalable reporting frameworks, conduct root-cause analyses, and present strategic recommendations to senior stakeholders. Skilled in SQL, Python, R, and Tableau, with a track record of driving measurable business performance through data-driven insights and operational strategy.

EDUCATION

Wake Forest School of Business, Winston-Salem, NC | Master of Science in Business Analytics | GPA: **3.96**/4.0 | *May 2026*
Honors & Leadership: *Beta Gamma Sigma, Wiseman Scholar, Graduate Student Ambassador, Center for Analytics Scholar*

Plaksha University, Punjab, India | BTech – Data Science, Economics & Business | GPA: **3.69**/4.0 | *May 2025*
Honors & Leadership: *Full Ride Scholar, Student Ambassador, Pioneer Student Election Committee Member*

SKILLS

Analytics & Visualization: Tableau, Looker, Power BI, SQL, Python, R, Excel, Microsoft SQL Server, Hypothesis Testing
Business Strategy: Go-to-Market Strategy, KPI Reporting, Revenue Operations, Root-Cause Analysis, Sales Analytics, A/B Testing
Cloud & Data: BigQuery, Google Cloud Platform, AWS S3, AWS SageMaker, Azure Synapse Analytics, ETL Pipelines, Vertex AI
Leadership & Operations: Stakeholder Management, Cross-Functional Collaboration, Agile, Project Management, Data Storytelling

EXPERIENCE

Castlery | *Graduate Consultant* | Winston-Salem, NC *Oct 2025 – Present*

- Developing a go-to-market decision framework for recommerce operations, synthesizing cost, vendor performance, and operational KPIs to replace a manual 2-vendor selection process, reducing cost per returned product by $500 through optimized routing logic.
- Conducting root-cause analyses on operational data to identify customer friction points, translating findings into actionable business strategies presented to cross-functional stakeholders, reducing friction by 20%.

Benori Knowledge | *Data Science Tech Analyst* | Gurgaon, India *Jan 2025 – May 2025*

- Headed a data science solution to deploy an automated pipeline for dataset curation, gathering and cleaning data from various sources to save 25 hours weekly and generate $20K monthly.
- Presented model performance findings and strategic recommendations to senior leadership, enabling data-driven decisions that reduced equal opportunity difference rates by 18% and improved F1-score by 12%.

Founder Forward | *Data Analyst* | New York, NY *Jun 2024 – Aug 2024*

- Built a Python-based ETL workflow to clean, transform, and load 5K+ records, improving data reliability by 45%.
- Developed 4 interactive Tableau dashboards surfacing KPIs for operations leadership, reducing time-to-insight by 40%.
- Partnered with operations teams to automate six database processes using JavaScript, enhancing system efficiency by 93%.

SBSF Agritech | *Data Scientist* | Berlin, Germany (Remote) *Jul 2023 – Aug 2023*

- Compiled and preprocessed 22K+ data rows to build a scalable data enrichment pipeline supporting growth curve modelling.
- Configured growth curves for 180 tree species in 40 agro-ecological zones, achieving a mean R-squared value of 0.86.
- Optimized ML models through Agile sprints, improving performance by 23%, strengthening species suitability assessments.

PROJECTS

DataCamp Data4Good 4th Annual Analytics Competition | *Team Lead* *Oct 2025 – Jan 2026*
Developed an NLP and generative AI solution for classifying answer factuality, applying ensemble modeling to achieve a 0.97 macro f1-score.

Wake Forest Data Analytics Challenge | *Tech Lead* *Sep 2025 – Dec 2025*
Led the development of a fraud detection analytical framework using large-scale transaction data with over 1 million rows, producing actionable risk insights with an 84% capture rate and $3.6M in projected annual fraud savings.

PovertyPred: Deep Learning Project | *Machine Learning Developer* *Jan 2024 – May 2024*
Built a graph-based computer vision model to predict household poverty levels across Kenyan villages using 90K+ street images, achieving 91% accuracy. Project was nominated for publication as one of 7 top submissions.

NOTABLE MENTIONS

- 2026 **First Runner-Up** (East Coast Region) DataCamp's 4th Data4Good Analytics Competition, competing against **120 teams**.
- 2025 Recipient of the **Wiseman Full-Ride Scholarship ($85, 000)**, Wake Forest University MSBA Program.
- 2024 **Libra Internship Program** Select from a global pool with an acceptance rate of 2.8% for the summer internship, New York.
- 2024 **Top 1%** in **NPTEL Database Management System** Course in a pool of **7134 students**.
- 2024 **Caseify Winner**: Business Case Study Competition judged by consultants from BCG, India.
- 2022 **Diana Award Recipient** for **Social Impact** through **Technology**, England.
- 2020 **25 Under 25 Leadership Gamechangers** in Africa, with a selection rate of **3%**, Nigeria (Youngest to receive the award).
